

# Assignment 1

**Department of Computer Science and Engineering**  
**Semester: Fall, 2018**

**Course Code: CSE 334(H)**

**Course Title: Wireless Programming**

1. Develop an restaurant menu android application. Which will contain two activities one will be named as Menu & another one will be named as Your order. The Menu activity will contain some food item names & their prices. User can select food items from the Menu. When they place order the Your order activity will show their order list & total bill of their order in taka & also converted into US dollar. Then they will confirm their order by calling or sending an sms from the activity (both call & sms should be introduced).
